

## Ibuprofen Before Crown Preparation and Cementation Appointments

To help your pulp heal from the crown preparation or preparation for its future restoration, please take 3-4 tablets of 200mg/tablet of Ibuprofen (brand names of *Advil* or *Motrin*) every 8 hours for 3-5 days. The first dose is best taken approximately 1-2 hours prior to your dental restorative treatment appointment (preparation appointment for the crown). Another regimen of the same may be taken starting 1-2 hours prior to the crown cementation appointment also.

If you take blood thinners or blood pressure medications, Ibuprofen may not be a choice medication for you.

Please ask Dr. Tatsuta if you have any questions.

Dr. Tatsuta's Cell Phone: (818) 269-9306

Wishing you comfort & health,  
Dr. Cynthia T. Tatsuta D.D.S.
